The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7-9, 13 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Emmons.

Emmons, in example 116, makes a polyurethane from trimethylolpropane (part of Mondur CB-75), diisocyanate, and high molecular weight mono-ols. The trimethylolpropane comprises about one wt. % of the isocyanate reactive components, and there are no other isocyanate reactive components. The polyurethane would be the same regardless of the catalyst used, and the NCO/OH ratio is 1/1.

Claims 2-6 and 10-12 are objected to for depending on rejected claims.
